[GovInnovator Interviews Dennis Culhane on Positive Impact of IDS for Education, Health and Human Services Systems](#)

In this interview Culhane and host Andy Feldman discuss examples of the benefits of an IDS. Culhane emphasizes their importance during critical transition periods, and provides examples about the ways in which agencies and programs benefit from these systems. He also addresses how barriers to starting an IDS can be overcome. Access the [full podcast](#).

systems can harness information in meaningful ways that transcend traditional “silos” and allow communities to focus collective attention on important social issues that cross systemic boundaries. Despite recent advances in use of integrated administrative data, practical information to promote adoption by new users is lacking.”

This article is “an introduction to potential uses of integrated administrative data for criminal justice researchers, including general benefits of using integrated data as well as implications for innovative research design. We describe a case example of data integration through a state data warehouse for a federally funded project on impact of incarceration on families. The project utilizes data from eight agencies (corrections, juvenile justice, mental health, substance use, social services, health, education, and environmental control) and includes development of an Online Analytical Processing cube. We draw from lessons learned to provide specific recommendations for developing researcher-practitioner partnerships that use integrated administrative data to improve translational criminal justice research and evidence-based practice and policy.” Access the [complete article](#).

[Why Broadening Access to Federal Administrative Data is Critical for Improving Government Services and Increasing Taxpayer Value: An Interview with Maria Cancian](#)

Andy Feldman of GovInnovator interviewed Maria Cancian, Professor of Public Affairs and Social Work at the University of Wisconsin–Madison and the former Director of the Institute for Research on Poverty, about her ideas for using the large amount of administrative data collected by federal programs to make policies and program more effective and efficient. During the interview she

focused on issues around accessing data and obtaining permission to integrate data across departmental agencies. Access the [full podcast](#).

[Labor & Education Issue Joint Guidance on Data Sharing for WIOA](#)

“The U.S. Departments of Labor and Education yesterday released [joint guidance](#) to help states match data for Workforce Innovation and Opportunity Act (WIOA) reporting.”

“We're giddy over this document here at WDQC. Joint guidance was our top [recommendation for executive action](#) submitted to the Obama Administration in 2014, and we served as a resource to federal agencies as they developed the guidance. It comes at a critical time for states, as they work to meet new WIOA performance reporting mandates and continue progress on longitudinal data systems.” Access the [complete article](#).
